DEDICATION

I would like to dedicate this report to my parents, relatives and friends who supported me during the industrial training and not forgetting my field and academic supervisors who endeavored to work with me tirelessly to completion.

ACKNOWLEDGMENT

This report has truly existed after receiving different supports both directly and indirectly from a number of people with different ideas and useful data or information.

I would like to extend my sincere appreciation to all those who contributed towards the completion of this industrial training report.

I am very grateful to Kapchorwa district local government (KDLG) for having considered my application for industrial training. Additionally, I would like to say a word of thanks to my field supervisors Dr Chelangat Jackson Gilbert and Dr Kamatei George Sabila whom they worked with me tirelessly in the field giving me guidance where possible.

I again extend my gratitude to all the beneficiaries of the organization (OWC) for having given me their attentions and positive response towards our activities.

Last but not the least I again deeply thank my parents and guardians for their assistance both spiritually and financially rendered to me towards the preparation of this report book and not forgetting my dear friends like Sayekwo Levy, Kibet Martin and many others.

Finally, I would love to take my sincere appreciation to my academic supervisors Dr Magumba David for the assistance rendered to me and his commitment made to reach me during the training and all the lecturers of Busitema University Arapai campus especially to Animal Department, Agribusiness and Extensions for their guidance given to me while at the university for example Miss Asero Diana, Mr. Okiror Simon Peter and many others.

ABSTRACT

This report is a compilation of all the information and data gathered within a period of ten (10) weeks of recess term/internship at kapchorwa local government under veterinary department. It has chapter one which contains the introduction, background, climate, location and size.

Chapter two that is containing description of the activities done during my attachment in veterinary department such as pet vaccination against rabies, meat inspection, farmer trainings, disease diagnosis and treatment, abattoir sample submission to veterinary doctor and making follow ups to people bitten by dogs during vaccination period and taking back vaccination equipment to the office after a every daily work.

Chapter three contains impact of attachment and skills gained for example livestock management like feeding, housing and breeding, livestock disease diagnosis and treatment, meat inspection, interaction with farmers hence improving on my skills in communication and problem solving capacity.

Chapter four contains conclusion and recommendation for example government should allocate funds to veterinary department for their improvements on laboratory setup and to improve on technical staff efficient and effective movements in service delivery in widening areas of operation.

Appendices, this contains field photos, a table and table containing the work plan during my industrial training attachment.

Reference, this section contains journals and the sources where some of the information in the report was obtained.

CHAPTER ONE

1.0 INTRODUCTION

I carried out my industrial training in Kapchorwa district local government under veterinary department. Industrial training is one of the course units run by the university to students pursuing different programmes of study and it is always conducted once at the end of the academic year. This programme took 10 weeks of recess term from 16th may to 22nd July 2016 and it was intended to equip students with field skills and enable them appreciate the correlation between the theory learnt from classroom and the practical skills obtained from the field of study.

1.1 BACKGROUND

Kapchorwa district is one of the districts of Uganda found in the Eastern region in Sebei sub region. Under colonial administration, kapchorwa district was Sebei County located in North Bugisu in the defunct Bukedi district; Kapchorwa district was granted district status in 1st February 1962, shortly before Uganda became an independent country. And of recent it underwent divisions and peeled off two other districts; Kongasis County forming Bukwo district in 2005 and peeled off another giving out Kween district in 2010. it is mainly occupied by the Sabinu tribe and few clusters of Bagishu tribe, and the languages spoken are Kubsabinu, Kiswahili and lugishu among others.. Kapchorwa district currently composed of only one county (Tingey) a total of 10 sub-counties and a municipal council with 3 divisions (Eastern, western and central division).

1.2 Location and size.

Kapchorwa district is located in Eastern Uganda. It borders with the districts of Sironko in the South, Bulambuli in the West and Northwest and kween district in the northeast and East and the Republic of Kenya in the East and south. The district coordinates are: 01 24N, 34 27E with a total area of 1204 km² with an altitude of 1,800m above sea level and current total population of 104580 people with a population density of 309.9 people per km².
