## DEDICATION

I dedicate this to my beloved parents for all their love and attention which has been possible for me to make it up to this point and as well as the internship adviser Mr. kutosi George who bestowed me with the courage, the commitment and the awareness to follow the best possible route, by his unmatched style and by best possible training. I dedicate also to my I.T supervisor mr. musoba Andrew.

---

And also to the entire staff of Busitema university Arapai campus who made me to be exposed to the field practices.

①

## ACKNOWLEDGEMENT

All the praises are for the Almighty, God who bestowed me with the ability and potential to complete this internship. I also pay my gratitude to the Almighty for enabling me to complete this internship Report within due course of time.

Words are very few to express enormous humble obligations to my affectionate parents for their prayers and strong determination to enabling me to achieve this successfully.

I take this opportunity to record my deep sense of gratitude and appreciation to my internship Advisor Mr. Musoba Andrew, department of management for his encouragement and inspiring guidance with his wisdom.

I also appreciate the cordial cooperation from all my concern management in the different department of Arapai campus especially Mr: Sserwanga Robert, Mr: Musoba Andrew, Mr Olupot - Mr Omiat and lastly to the faculty dean for providing me requisite information and knowledge for compilation of my complete internship.

## ABSTRACT

- This report is about the industrial training activities that I carried out at Buwali sub.county Bududa district during the period of 10 weeks. I was carrying out this activities in animal production section.
- Objectives of field attachment include; to gain practical based experience, knowledge and skills competence, to develop student's personal morals such as innovation to apply theoretical knowledge gained from the university in solving real life problems to build good working relationship with organization staff and farmers.
- The activities I undertook during the industrial training include; Management of day one old chicks, vaccination poultry diseases like NCD, fowl pox, fowl typhoid, treatment of animal diseases e.g., babesiosis, ECF, Anaplasmosis, hypocalcaemia (milk fever), spraying of ticks.
- In IT I gained the flowing skills and knowledge: how treat some animal diseases like ECF, babesiosis, Anaplasmosis, vaccination schedule for poultry, how to manage day one old chicks, how to associate with the community.
- Impact of IT are the flowing; problem long distance to farmers homes for treatment, luck transport, luck of funds to purchase drugs, poor payment of the farmers, hunger.
- In my conclusion, I conclude by saying that the IT was successfully done I appreciate it, I thank the entire BUAC team for giving me the knowledge and skills which helped me in IT. I also learnt very important skills as well as experience during my training.
- I recommend that the university should provide transport and money for feeding and accommodation to students.

## **CHAPTER ONE**

### **1.0 INTRODUCTION**

#### **1.1 MEANING OF INTERNSHIP/ INDUSTRIAL TRAINING**

Internship is a course unit run by universities for most of the programs. This is intended to equip students to field skills and enable them appreciate the link between the theory learnt in class and their respective professional fields. At Busitema University the activity is meant to run for ten (10) weeks. At the Faculty of Agriculture and Animal Sciences, industrial training is done during the internship period. To comply with the university requirements, from May 21<sup>ST</sup> to July 27<sup>TH</sup> 2018, the author trained at Arapai farm. Experiences gained and observations made are reflected in this report.

The industrial training was carried out in Buwali s/c, Lutseshe County, Budada district for the period 10 weeks from 21 May to 27 July 2018 with the department of production and marketing.

#### **1.2 OBJECTIVES OF INTERNSHIP**

To apply theoretical knowledge gained from the university in solving real live training problems

To gain practical field experience, skills and competence required for effective and efficient implementation of agriculture and other rural development programs.

To build sustainable good working relationship with the agrarian community and other stake holders in agriculture and rural development sector.

To identify knowledge gaps in agriculture production activities of agrarian community and give appropriate recommendation that effect.
