DEDICATION

I extend my great thanks to the almighty God for having enabled me to finish my industrial Training (IT) successfully and I also express my gratitude to my beloved mother Kadondi laya

Mwidi Samuel for financial and material support by saying to them that bravo for giving me a hand.

ACKNOWLEDGEMENT

With due respect, I wish to appreciate the efforts of those people, who helped me in writing and producing this report, financially, academically, socially and spiritually.

My due thanks go to the management of Busaba sub-county, Butaleja district for accepting me to carry out my field experience work in the local sub-county and the entire communities and for being hospitable and availing me with all the necessary information and practical work at the sub-county.

Great thanks go to **MR. HAMILLAH YUNUSU** for his tireless effort to reach me during the field attachment period at the sub-county.

Of great importance my sincere thanks go to the almighty God for the protection offered, favor, grace and love, may his name be glorified.

ABSTRACT

Internship is a practical module undertaken by all students in Bustema University during their recess term and is basically to help students acquire more practical knowledge and skills in their respective field of study. The placement was done at Busaba Sub-county, Butaleja district where many programs are conducted for example livestock health in the areas of animal health, animal nutrition, animal breeding and apiculture, lectures, brain storming and practical sessions were carried out under the supervision of scientists and research technicians both on farm and in the laboratories. The mode of learning helped me to gain practical skills such diseases, diagnosis, restraining farm animals, setting tsetse fly traps, castration of goats, pigs, cleaning of the pig sty, feeding of animals, construction of goats' pen and other managerial practical skills and control of tsetse fly species in Uganda. Identifying different breeds of goats, cattle and pigs. Despite of appreciable magnitude of the achievements, I faced a few challenges such as long distances, weather conditions and limited access to equipments in the laboratories to fully accommodate overwhelming number of internship students and unavailability of modern farm structures. However I successfully completed my internship and do recommend the entire Busaba sub-county staff, Butaleja district to increase on the labour force, stock more equipments and also provide some facilitation on drugs and transport means for the students carrying out their internship and also equipments, equip the laboratories and construction of modern farm structures for the future internship students.
