ABSTRACT

This report contains and explains the activities, skills and qualifications gained, challenges faced during industrial training, conclusion of report and recommendations derived from challenges faced at Nyenga. The objective of this industrial training is to make students to benefit from knowledge and skills gained from field, apply the knowledge they got from classroom in field and gain confidence in students. I was attached in two sections i.e crop and animal section. In crop, I was the leader of making urban gardens and these activities made me gain a lot of skills such as pest and disease identification. During internship, I faced challenges of limited tools, shortage of workers which slowed my work. In conclusion, both activities were carried out successful in both sections despite the challenges faced. I was in position of getting practical skills and knowledge in line with my carrier and relating with people in field. The technical advice that I provided addressed Manager's problem and needs. Much as all were successful done, there were some little challenges which hindered smooth running of activities making me recommend that proper mobilization of workers must improve to solve the problem of labor shortage. There should also be provision of working tools to solve the slowdown in working

3.5

CHAPTER ONE

1.1 INTRODUCTION

Nyenga Foundation is a private organisation owned by "WHITES" in NORWAY. It has both crop and animal section. The organisation takes care of orphans and running a school which is New Horizon primary school and a healthy centre in kabizzi village

1.2 HISTORICAL BACKGROUND OF NYENGA

Nyenga foundation started as a children's home in 2009 and 2010 to support the less privileged such as orphans and then changed to Nyenga foundation in 2017, 2012 the school was formed for these children to solve illiteracy level within the children and community members. A healthy centre was later constructed to treat the community members and the home children who were being affected majorly by malaria and AIDS that was killing many of their parents. With an increase of children, Due to scarcity of food, the farm was set up to produce food for the community and home children.

1.3 VISION

To build and run a centre of competence at Nyenga where people can meet, share and learn from each other.

1.4 MISSION

To promote sustainable growth through empowering individual, families and communities

1.5 THE PURPOSE

- To establish and operate the children home in Uganda based on local resources and sustainable development
- Collaboration with the local community shall stimulate local development
- 3 Through care and knowledge, work towards the goal that the children can create for themselves and coming generation.

1.6 OBJECTIVES

1. To acquire new knowledge.
2. To gain practical skills and experience.
3. To enable us to learn.
- 4 To improve confidence in problem solving in the real work situation.
