DEDICATION

I do dedicate this report to my beloved sponsors Dr. and Mrs. Oriokot Joseph and all my relatives for their endeavors to support me both materially and financially while during the training.

I would also love to dedicate this report to my parents Mr. and Mrs. Aminu Charles that I dearly love them and that may the Almighty God reward them for raising me up to this level I am in life.

Finally to my friends, brothers sisters and colleagues in Arapai Campus not forgetting the entire church and executives of St. Andrews Church of Uganda that may you be blessed in all you do.

ACKNOWLEDGEMENT

I do extend my sincere thanks to the farm manager of Busitema University Arapai Campus Dr. Okwany Patrick and highly acknowledge his gratitude and effort in his supervision he gave to me during the period of industrial training. Though being busy but always sacrificed his time attending to me. Not forgetting Mr. Ewalu Patrick Moses, Mr. Oonyu Source Peter, Mr. Buluma David, Mr. Olupot Julius, Mr. Muyindo Williams for their endeavors in supporting and guiding me during the training.

I do wish to express my sincere thanks and gratitude to the head of department in Extension and Agribusiness, Madam Asero Diannah for her parental advice she always gave me, the head of department Mr. Trysingura Geoffrey and the registrar for her kindness for having given me the privilege to pursue my DCP course at Busitema University Arapai Campus.

Once more, I do wish to acknowledge my dear lecturers, friends who worked hand in hand with me during our industrial training, my academic supervisor Dr. Okwany Patrick and finally to the Almighty God for giving me grace and strength allover up to the end of the training successfully.

ABSTRACT

This report embraces of all the knowledge I got from relevant areas of learning. I engaged myself in during the period of industrial training.

Industrial training refers to the work experience that is relevant to the academic and professional development of a student before graduation.

In this report, there are a number of pages starting from the introductory page which tells more about the activities been carried out, preliminary pages (i) to (vii) chapter 1 introduction i.e. on the historical background of BUAC, location, organization structure as well as the mission and vision of the organization (BUAC)

Chapter II description of all the activities I engaged myself in on the different areas such as crop sections, animal sections and various trainings that I attended. Chapter III consists of all the impacts of the activities, the skills gained during the attachment, correlation of the classroom knowledge and attachment activities, responsibilities undertaken during the attachment and the influence of the attachment to my future career plan.

There is also chapter IV which contains the challenges encountered, recommendation and conclusion, reference, appendices inform of photographs and finally the work plan that I used during IT been attached.

CHAPTER ONE

1.1 INTRODUCTION

This report is all about IT that I carried out at BUAC under the solemn supervision of the farm manager Dr. Okwany Patrick and other field supervisors.

The training commenced on the 21st May 2018 with orientation and introduction of the staff members who were to take us through the training and continued up to the 27th July 2018.

It was done every day from Monday to Friday starting from 8:00am.

However, this report was covered within a period of 2½ months and below were main aspects of learning.

Crop section

Animal section

Above all, these were some of the activities I engaged myself

Spraying of the crops against pests and diseases

Spraying of animals (cattle) using Alfapor accaricide

Field marking and planting citrus seedlings

Cleaning the piggery unit and small ruminants section

Planting banana suckers

Feeding pigs, watering pigs, repairing cattle crush, goats pen and so on.

I also attended various training s such as;

Training on disease investigation and aging in cattle

Training on poultry health

Training on crop pests and disease identification
