ABSTRACT

This comprehensive report contains and explains the activities carried out during the internship period, knowledge and skills attained, challenges faced during the industrial training period, conclusions and recommendations derived from the challenges faced during the industrial training period.

The main objectives of the industrial training are to equip students with the required field skills and also to apply the knowledge students get from the classroom in the field.

During my internship, I was oriented and what followed was carrying out of different activities such as dipping cattle, pasture establishment, parasite control, fodder harvesting and feeding animals, calf management, castration, dehorning, fish sampling, goat management, drug identification, hay making and many others. These activities have enabled me to gain the required field skills in crop and animal management. Through outreaches, I have also gained self-confidence and also acquired communication skills.

During the internship period, I faced some challenges like lack of sitting materials in many sections at the farm which affected my writing skills, long journeys from the farm to the places of outreaches and also lack of some sections at the farm like the poultry section, piggery section and the small ruminants section.

In conclusion, the activities and industrial training was carried out successfully.

I also recommend the farm that it should provide sitting materials at the farm in order for the students' writing skills not to be affected. It should also add sections such as the small ruminants, piggery and poultry sections at the farm in order to equip students with all the necessary field skills.

CHAPTER ONE: INTRODUCTION

1.0 Introduction

The industrial training was carried out at Kasajja stock farm from 28th Feb. 2022 to 6th April. 2022 where by a number of activities were carried out at the farm and which includes the following orientation, making work plan, cleaning milking parlour, dipping animals, pasture establishment, parasite control, fodder harvesting and feeding animals, calf management, castration, dehorning, fishing sampling, goat management, drug identification, pasture identification, hay making and apiculture. Internship is a course unit run by the universities for most of the programs this is intended to equip students with field skills.

1.1 Location of the Farm

Kasajja stock farm is located in Nakaloke sub county, Kolonyi zone 1 in Mbale district. It is 8km north of Mbale town boarding 2 districts of Butebo in western direction and Bukedea in north direction

1.2 Mission of the Farm

To produce high quality milk

1.3 Vision of the Farm

A world in which people are empowered to succeed in the global economy

1.4 Objectives of the Farm

- To produce high quality milk for home consumption and commercial purposes.
- To create employment to local people around.
- To become a mode farm in Uganda.

1.5 Background

Kasajja stock farm was established early 1970 with poultry farming and local zebu animals occupying 50 acres of land.

Then in 1982 five (5) exotic breed of animal (freshen) and one (1) bull was introduced from Kenya. Now the farm has 149 cattle

The farm was founded by late Byakika Kasajja who was an agricultural officer as well as a politician and He was a member of parliament of Butaleja constituency which is now Butaleja district. He was shot in
