DEDICATION

With much love, I would like to dedicate this internship report to almighty Allah, my brothers Ajobe Bran , Buruga H Anderson, Adiga Rashid, Mother Nusura Ifunga. and the rest of the family members for their tireless care, protection moral, advice and financial support offered.

May the Almighty Allah guide and bless them.

ACKNOWLEDGEMENT

I am much glad towards the successful finishing of this industrial training and therefore the following deserve acknowledgement for the tireless effort

First and foremost, I would like to express my honest gratitude and appreciation to my field supervisor Mr. HAKIM Godfrey who has been in supervision with me during the industrial training schedule.

Secondly, would also like to congratulate the farm instructor Mr. ELLY ISSAC, agric instructor for Jabara. and ALLAN ISMAIL not forgetting the fellow interns THOMAS for their effort in special, professional guidance, time, and patience in due course of the industrial training.

Thirdly, I would like to thank and congratulate the administration of Busitema University and the entire staff members of Arapai Campus for the professional knowledge offered that has enabled me to carry out the training.

May the Almighty Allah bless them abundantly?

ABSTRACT

Industrial training is one of the syllabus in the curriculum of Busitema university Arapai campus (BUAC) under faculty of agriculture and animal sciences (FAAS) in Soroti district one of the eastern mother districts of Uganda that has added core values to the certificate, diploma and degree program by enhancing opportunistic skills of graduates. This report assesses the impact of training in skills and knowledge by under taking training in crop and livestock enterprises such as poultry management, cattle management, goat management, crop management and other correlating activities within JAVIK schedule in particular. Not only the training enhances effective and successful improvement of skills, knowledge and experience of student but however, it creates chances of employment opportunity after graduation hence providing reliable source of highly skilled, literate social workers a qualification figure of employees. The information of activities was collected through non-structural interviews, direct observations, recorded literatures, questioning and practical demonstration and various activities gathered in the training is presented by tabular and content form

The practice exposed the student to real work experience, environment and promoted the application of theory into practice through under taking activities like deworming in livestock, control of parasites, animal health management practices, feed formulation in poultry production, other livestock management practices e.g. hygiene and sanitation ,grafting of mango seedlings likewise pruning of citrus, weeding as management field practices, preparation of plant tea manure, site selection, nursery bed preparation and fertilization, planting of various crops with farmers in JAVIK at recommended spacing as well as office management skills and record keeping were under taken.

The training is the only opportunity for a student to engulf hand on job experiences, skills and knowledge by applying theoretical concepts and developing work attitude in their future career, understanding the bottlenecks of working life and hence correlating it with field execution and the classroom knowledge as core courses are concerned.

The areas of concern are student supervisor coordination, facilitation of students during the course of the training for both the private and government students in a way of appreciating them to secure future career job plans both by NGOs and government.

CHAPTER ONE: INTRODUCTION

1.0 introduction

This industrial training was conducted at **JAVIKS P.O. Box 1, lobule sub – county Koboko** (Uganda) along **Kimu road**. The purpose of this industrial training is to help me relate academic programs to actual work and also acquiring hands on skills outside the university, the training was from **28TH FEB to 6TH MAY 2022**.

This chapter covers the background of the organization, mission statement, vision statement, core values, goals and objectives of the organization. Also describe the operations of the organization.

1.1 background of the organization

Jabara Agricultural and Vocational Institute Koboko(**JAVIK**) started in 2009 as an agricultural demonstration and cassava multiplication Centre by **ACAV** an Italia organization based in West Nile together with **Koboko district** local government and the community.

Since then several farmers were trained on modern agricultural technologies and practices

The idea to transform **JAVIK** into an agricultural and vocational institution was conceived in 2013 following the influx of refugees from **Congo** in to **Koboko District**.

In the year 2015 **JAVIK** began operating non formal training of refugees and farmers from the host community in various agricultural enterprises to improve their social and economic status. And in 2017 the institution started offering National Certificate in Agriculture (**NCA**) with a total of 22 pioneer students.

Currently **JAVIK** offers both formal and non-formal training for students and farmers. The duration of the formal program is two (2) years mean while the non-formal training ranges from one (1) day to six (6) months depending on the interest of the farmer and the agricultural enterprise selected.

JAVIK is located in Jabara village, **NyoriCheku parish** along Kimu road in lobule sub – county, koboko Uganda.
