### DEDICATION:

With deep gratitude, I would like to dedicate this report to my family with which I always share all the outcomes of my engagement in this career. At times it is not easy to apportion time for the academics at the same time attend to the family demands. However they have always been patient with me.

In a special note I also want to dedicate it to my academic supervisor Dr. LUBADE GEOFFREY and my field supervisor Ms. AYIKORU JANE and to all the university lecturers like Mr. AMAYO ROBERT for the great advice they gave and not forgetting all the staff of KULULU Sub County. Lastly, dedication goes to my parents KEMISI .Y. CHOGO my father, AJURU KEMISA my mother for supporting and encouraging me and all my friend who has been with me throughout my community outreach, giving me all kind of support and advice for the success of my education.

### **ACKNOWLEDGEMENTS:**

The grate acknowledgement goes to almighty ALLAH for the abundant health given to me at same note making me to have completed the community outreach successfully, Special thanks and my sincere gratitude to staff of Busitema University, Faculty of Agriculture and Animal sciences. Especially to Mr.Turyasingura Geoffrey who is heading the crop department. I also take this opportunity to thank my beloved wifeAJIKOFATUMAand the entire family for the time dedicated both moral and physical support during the training term.

## ABSTRACT

Community outreach is one of the course units in the BSA curriculum at Busitema University. This course unit is done in the second year, second semester, the major objective of this course unit is acquisition of extension skills where a student is expected to enter into the community, identify several problems faced by farmers and give various solutions or a contribution towards problem solving in the community. I conducted my community outreach with Kululu sub county local government –yumbe district.

During community reach I was attached to the department of production and marketing this was followed by orientation where I was first introduced to the subcounty technical staff and the politician and later I implemented the activities such as; Training of farmers on selected field crops and other government programs like parish development model so as to equip farmers with general knowledge and skills in identifying and solving problems now and then, Field verification exercise with the aim of ascertaining the ready fields ready to receive seeds Distribution of pomology seedlings, bean seeds, cassava cuttings which improved on technology adaption within the subcounty , Pits prepared for the planting of banana (matoke) with the aim of improving food security and house hold income ,follow-up of activities implemented none governmental organization like DRDIP ,NRC,WELT HUNGER ZOA ,establishment of woodlots for restoration of environment ,joint monitoring of projects to check on the progress (implementation status ), data collection for proper planning ,formation of committee in various project like WE ARE ABLE for proper coordination of the project,pests and disease management this was to increase production and productivity of field crops , technical back stopping on excavation of valley tank to trap runoff (ground water) which ensured continuous production of crops majorly vegetables such as tomatoes,watermelon and cabbage In conclusion the short period of time spend at kululu sub county local government triggered and shaped me in the areas associated with the dynamics of local government work. Not only did I gain knowledge and practical skills, but I was also given chance to share practical hands on knowledge experience with the field community farmers I do recommend the management should prioritize and increase on the budget allocated for their farmers so as promote production and productivity of technologies

## CHAPTER ONE.

### 1.1 Background of Kululu Sub County

Kululu Sub County Local Government has 49 villages with 10 parishes and got its sub county status in 2010 curved from mother sub county Kuru Sub County

Kululu Sub County was located in south east of Yumbe District with a total land area of 4780 sq. km. It is bordered by Obongi District in the east, Ariwa Sub County in the South, Bijo Sub County in the west, Romogi Sub County in the North and Odravu Sub County in south west. It has ten parishes: Komgbe, Yoyo, Dradranga, Akuru, Ovumzoku, Ewafa, Ajuji Dongoloto, Logbodo, Kulacha. The Sub county headquarters is located in Luzira village, Yoyo parish along Lomunga- Obongi road and it is about 6km from the district headquarters.

### 1.2. Vegetation

Vegetation cover consists of woodland on the rocks and hillsides whereas the plains have grassland cover. There are also shrubs in their natural occurrence on the plains and hill slopes consisting mainly of stunted trees.

### 1.3. Climate

The climatic pattern of the area is characterized by two seasons; the dry season and the wet season. Traditionally the dry season ran from December to early March which is followed by peaks of downpour in April and August. These months are simply peaks, otherwise a rainy spell that subsides in October/November paving way for the dry season. During the dry spell, a cold dry windy weather is concurrently experienced.

### 1.4. Beneficiaries of Kululu sub county

The beneficiaries are the CBF, PWD, HIV/AIDS group, Adult and Youth groups.

### 1.5. Visions:

To transform, literate, health and productive community for sustainable socio-economic development by 2030

### 1.6. Mission statement:

To help the community through effective and efficient services which focus on national and local priorities and contribute to the improvement in the quality of life of the sub county
