ACKNOWLEDGEMENT

First and foremost, I would like to thank the Almighty GOD who has protected me throughout this training period. Then, I extend my gratitude to the Human Resource Evervictory limited **MS TIMUHEIRWE DIANA**, who granted us permission to do this internship training with them. A great thank goes to my field supervisor **Ms. ALING PHIONA** for mentoring me in a right way and academic supervisor **KONGAI HELLEN** for the great supervision given to me and not forgetting all the university lecturers who trained me actively in the class and in the farm during farm practice. I also acknowledge my parents **MR. WAMIKA CHRISTOPHER AND MS MUKISA SARAH** not forgetting my relatives and friends like **MR MUZIRA JULIUS** who supported me during the time of industrial training. Lastly i would like to send my sincere appreciation to my friend **MUSIBIKA CHELSEA** for being patient with me and also for the advisory support she used to give me.

ABSTRACT

Industrial training refers to the practical training in the company, farm or an industrial environment that helps the students in developing the required skills which will help them in becoming a professional of the future. Evervictory is a private limited company that was registered on 25th-jan- 2007 and has been operating since then, its fully licensed by the Uganda National Drug Authority (NDA) to carryout business nationwide in the area of marketing and distribution of veterinary drugs and vaccines. This report describes the activities done or implemented, skills and knowledge gained, challenges faced during industrial training, conclusions of the report and recommendations derived from the challenges faced at Evervictory limited in container village within Kampala city during my time of industrial training. The activities are divided into two; **farm visit and pharmacy activities**. Activities at the **farm include**; vaccination of bird and animals, treatment of birds and animals, turning litter in poultry house, Debeaking poultry, preparing a brooder house, diagnosis of animal diseases, castration of piglets and activities at **the pharmacy** were; prescription of drugs, extension services to clients at the counter, stock taking, packing drug/vaccines bought by clients, monitoring/ regulating refrigerator temperatures (between +2 and +8), of which I gained skills and experience in all the above activities. Some of the challenges faced included; long distance to reach the farms, harsh climatic conditions especially heavy rain fall which would delay the activities. I conclude by saying that the internship was carried out successfully and I was able to gain a lot from it. I was in position of getting practical skills and knowledge in line with my career and relating with people in the field. The technical advice that I provided addressed farmers' problems and needed. I recommend that in order for the internship to run smoothly, the university should establish good relationship with the commonest private companies operating in this field to which its students get attached, one of which is Evervictory ltd.

1.0 CHAPTER ONE

1.1 introduction.

Industrial training refers to the practical training in the company, farm or an industrial environment that helps the students in developing the required skills which will help them in becoming a professional of the future.

This report describes the activities done or implemented, skills and knowledge gained, challenges faced during industrial training, conclusions of the report and recommendations derived from the challenges faced at Evervictory limited in container village within Kampala city during my time of industrial training.

1.2 objectives of industrial training.

- Students are able to apply classroom knowledge into hands on practicals in the field.
- Students acquire skills from the field work.
- It builds confidence and self-esteem within students.
- It also enables the students to discover the abilities within that specific field.

1.3 background of Evervictory limited

Evervictory is a privately owned company under the management of different board of directors that was started in 2005 and it was registered on 25th-jan- 2007 and has been operating since then, its fully licensed by the Uganda National Drug Authority (NDA) to carryout business nationwide in the area of marketing and distribution of veterinary drugs, vaccines, equipments, day old chicks and feed supplements in Uganda for small and large animals, pets and poultry. The company also breeds chicken with its farm located in Lugazi town council and trains students of animal science from different institutions and universities about drugs and their prescriptions, vaccines, equipments, animal husbandry practices like castration, deworming, identification, treatment etc. the company also trains farmers (clients) about animal keeping, all these trainings are done to equip them (students and farmers) with knowledge and skills in animal production and management, with the aim of improving on the livelihood and development of the nation as a whole in terms of agriculture and also to increase on the house hold income.
