**DECLARATION**

I NAKIRYA JOSELINE declare that this report has never been submitted to any university or any other institution of learning for any academic credit.

Signature..... 

Date..... 09/09/2016

Internship training as documented in this report was supervised and submitted with the approval of the following.

1 Dr. Okwany Patrick

Academic supervisor

Signature..... 

Date..... 09/09/2016

2 Mr. Mutume Tito

Field supervisor at Busitema university Arapai campus farm

Signature..... 

Date..... 06/09/2016

## DEDICATION

I dedicate this report to my farther Mr Taitankoko Fred,my mother Mrs Nali Justine,My brothers Tambaki Ben, Taitankoko Mathius, Taitankoko Kalori ,Igongolo Francis, Taitankoko Fred, my sisters Mukopi Prossy, Logose Christine, Logose Dementiria, Nakisire Gertrude,My family to be and all my lecturers in deed I am grateful for their professional support.

## ACKNOWLEDGEMENT

I would like to express my gratitude to my almighty God for giving me the ability, persistence and the energy to complete this report.

I am grateful to the faculty dean of Arapai Campus Dr Onzima Ronald Jelly (PhD) and the deputy dean of students Dr Ekou Justine for granting me permission to carry out my internship at Arapai campus.

Special thanks go to our field supervisor Mr mutume tito who gave us time and expertise during the course of the training.

I would like to thank the staff of Busitema university Arapai Campus, I am in deed grateful for their professional support.

And to all others without whose help the training would not have been complete but who could not be mentioned here I would like to say I am great to you all and thank you.

Lastly thanks go to all people I have met during the completion of my report; it was indeed a worth while experience.

PM:.....Postmortem.

PMA:.....Plan for Modernization of Agriculture.

## LIST OF TABLES AND FIGURES

Table 1: Showing suggested nutrient levels.

Table 2: Showing vaccines for different poultry diseases.

Figure 1: Showing students doing an incision and drainage operations.

## ABSTRACT

This report is about the industrial training activities that I carried out at Busitema university Arapai campus farm during the period of 10 weeks. I was carrying out this activities in both the crop and animal sections. In the animal section , I did activities such as vaccination of poultry birds, feed formulation, I also underwent a training on clean milk production, rabbit production, general knowledge on pasture production and management, animal diseases and treatment and many other activities and in the crop section I did spraying of crops, I also underwent a training on crop pests and diseases control and management, training on post harvest management and many other activities.

This training has helped me to gain some important skills such as injection of animals, spraying of animals, crops, disease and peat management in both animals and crops, that I hope to go and apply out there in the field to help my community and to serve my country. Although there was enough to learn from this training, there were also some challenges that I met during this period that include; hunger was a big problem, there was also a problem of some sections not being attended to by the responsible supervisors and this made the learning very difficult at times , there was also a problem of natural calamities like sun shine and rainfall that interrupted with the study.

The university has to make some adjustments like employ more staff to handle students during this learning period; the university should also make sure that they take the students to departments that are not found at school like meat inspection and many others.

## CHAPTER ONE

### 1.0 INTRODUCTION

#### 1.1 INTERNSHIP/ INDUSTRIAL TRAINING

Internship is a course unit run by universities for most of the programs. This is intended to equip students to field skills and enable them appreciate the link between the theory learnt in class and their respective professional fields. At Busitema University the activity is meant to run for ten (10) weeks. At the Faculty of Agriculture and Animal Sciences, industrial training is done during the internship period. To comply with the university requirements, from May 16<sup>th</sup> to July 22<sup>nd</sup> 2016, the author trained at Arapai farm. Experiences gained and observations made are reflected in this report.

#### 1.2 OBJECTIVES OF INTERNSHIP

Internship offers many opportunities to the student, some of these include:

To acquire new knowledge.

To gain practical skills and experience.

To further appreciate the use of the theory learnt in class as applied in the field.

Improve confidence in problem solving in the real work situation.

To enable the student learn from the challenges and demands of work places.

#### 1.3 BACKGROUND

Busitema University is a public University established by statutory instrument in November, 22, 2007 enacted by parliament on 10<sup>th</sup> May 2007.

It has six campuses namely; Arapai, Busitema, Kaliro, Mbale, Nagongera, Pallisa and Namasagali.

Arapai Campus where I did my industrial training is located at the former Arapai Agricultural College along Moroto road in Soroti district with an estimation of 671 hectares of land.
