Figure eight shows technical advice on savings to Farmers

Table one shows the work plan for industrial training

07

ABSTRACT

Industrial training is one of the course modules at Busitema University done by all students for the partial fulfillment of academic credit reward. Students are attached to different organizations, farms among others of their own choice to learn how to carry out different activities in the field and in the office. This helps students to acquire practical skills in the field, develop confidence through interacting with different Farmers and other people, find out problems most Farmers face and how to go about them, look at ways of developing and achieving future career plans of students. I would request the University to give more time to students so that they can carry out most activities and interact more with different Farmers and people for their own benefit

CLB

CHAPTER ONE;

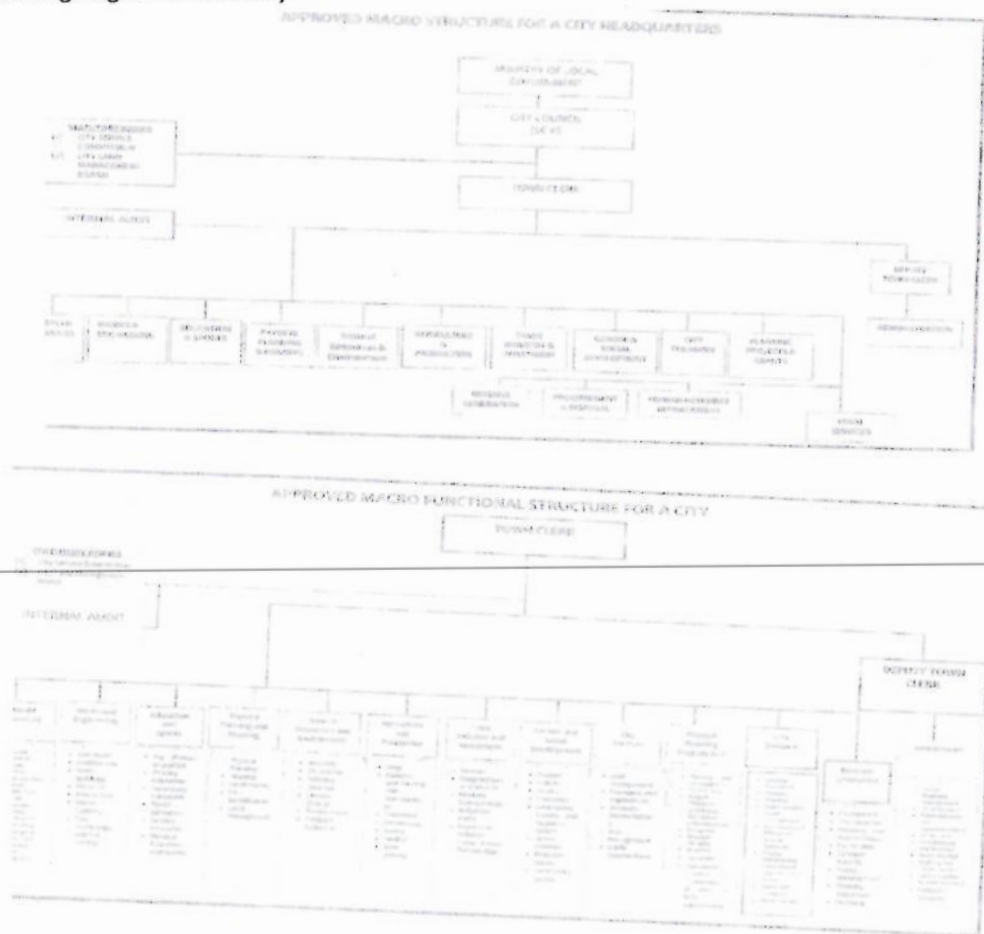

INTRODUCTION

Lira city East division is a local government part of Lira city in Lira district which was developed in fulfillment of Uganda vision 2040 alongside the corresponding national development plan and other districts and municipality development plans. Its main goal is to increase household income and improve the quality of life of inhabitants of Lira city east division. This goal will be achieved through livelihood support to the community groups who will in turn utilize the resources to invest in key growth opportunities like crop production, livestock production, mixed enterprises. The groups will be supported with value addition equipments like maize and rice hullers which will result to high income and quality education.
