CHAPTER ONE

INTRODUCTION

Teso College Aloet is government aided school having two wings. That is to say East and West wing. It is basically a learning institution with a school farm to support the school both with food and financially assistance. As an intern student I was attached to the school farm.

Background

Teso College Aloet school farm started in 1971 under the leadership of Mr. Akabway Stephen as the Head Teacher. This was financed by the ministry of Education and Sports. It started with both crop and animal enterprise. Draft of dough power was used, hired labour and students were both used to provide labour to the farm.

Organization of the Farm.

The farm is headed by the teacher of the school who is in-charge of recruitment of the farm manager who heads the farm section. There is assistant farm manager who reports to the farm manager and farm attendant who also reports to the farm manager or assistant. There are also internship student that include me and my colleagues who report to the farm manager or assistant farm manager.
