Figure 1 SHOWING ORGANISATION STRUCTURE OF AAC5

ABSTRACT

Industrial training is one of the course modules done by students pursuing Diploma in Crop production and management (DCP) and was carried out at Adraa Agriculture College with them aim objective of giving hands on experience to students on different fields of agriculture from 28th Feb 2022 to 6th May 2022.

The industrial training was conducted on various sections such as; livestock, Outreach Development Centre (ODP), vegetables, tree and fruit nursery, field crop, Bee Development Centre(BDC) and demonstration plot and in these sections the following activities were done; castration of pigs, feeding, deworming of animals, honey processing, wax processing etc.

During the internship the following skills were got such as; capacity building on psycho social methodologies of facilitation, pest identification, disease identification etc.

During the industrial training, I undertook the following responsibilities; watering the nursery bed of tomatoes, feeding the birds, Staking tomatoes in the vegetable section etc.

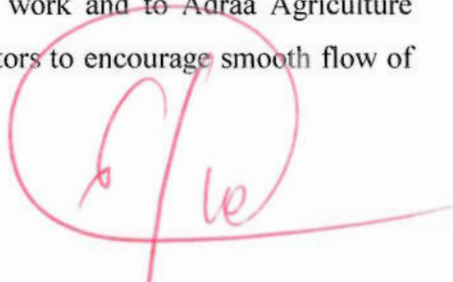

The industrial training influenced my future career through the activities carried out during the industrial has made me acquire more skills and knowledge to in the field of agriculture.

The industrial training and classroom knowledge are highly correlated in a way that the classroom knowledge gives a comprehensive view of what is actually done in the field, the same way the field experience gives a better understanding of what has been covered in class.

Challenges faced during the training include; longer working hours, failure in fulfilling planned activities, poor turn up of the instructors and technicians in some sections etc.

In conclusion, amidst the above challenges, the various activities and operations carried out during the industrial training at Adraa Agriculture College (AAC) has made me acquire more skills and experience. Therefore, I conclude that the internship was successfully done.

The following recommendations were made both to the university and Adraa agriculture I college; to the university, timely supervision of students to monitor their activities at the place of attachment so as to improve the quality of their work and to Adraa Agriculture College; proper time management by technicians or instructors to encourage smooth flow of activities

CHAPTER ONE: INTRODUCTION

1.0 Introduction

Chapter one consists of the organization name, geographical location, how the organization positions itself in the industries, size (number of employees), It also gives information on the department the intern worked and elaborates the individual roles the intern did and the types and levels of skills that were required for the given skill, when the task was done, for whom and finally the organization structure.

1.1 The background of the college.

Adraa agriculture college AAC was found in 2012. The purpose of the college is to educate and train people from rural communities in Uganda, South Sudan, and north east democratic republic of Congo. The main aim of this education and training is to improve capacities and capabilities so that rural people could have access to available natural resources to achieve sustainable livelihood for themselves and communities.

The college is registered as an agriculture training institution by the ministry of education and sports, Registration Number: MOES/BTVET/219. The official name of the institute is Franciscan Brothers Adraa Agriculture College (AAC). This registration will give it an official status as training institution of the corporate entity above and all legal obligations will still be vested with the trustees.

Currently AAC legal identity is the registered trustees of the Franciscan brothers (Br) (Africa region) Nebbi Uganda this entity is registered as a cooperate body under the trustees' incorporation act of Uganda by the ministry of lands, water and environment. All legal obligations are therefore currently vested in the trustees.

1.2 VISION

Vision of the college is a society where the marginalized are prioritized and the earth is cared for.

1.3 MISSION

Mission of AAC is to empower the marginalized in their struggles to liberate themselves and to care for the earth.
