

FACULTY OF ENGINEERING

**DEPARTMENT OF AGRICULTURAL MECHANIZATION AND IRRIGATION
ENGINEERING**

**DESIGN AND FABRICATION OF AN AUTOMATIC INDIRECT ACTIVE
SOLAR DRYER FOR SWEET POTATO CHIPS**

BY

Masiga Dan – BU/UP/2016/1177

Supervisor

Mr. Obeti Grism Lawrence

*A final year project report submitted in partial fulfilment for the requirement for award of the
BSc. In Agricultural mechanization & irrigation engineering*

DECEMBER, 2020

DECLARATION

I **MASIGA Dan** do hereby declare that this final year project proposal report was prepared and written by me and it's my own work. It has never been presented to any other institution of learning for award or published anywhere

Signature..... Date.....

Supervisor

Mr. Obeti Grism Lawrence

Signature Date

ACKNOWLEDGEMENT

My sincere appreciations are extended to my family members, and course-mates of AMI 4 2020 for the moral, material and academic support to this of course of AMI

I also acknowledge my University supervisor Mr. Obeti Grism Lawerence for his tireless guidance during final year project proposal report writing amidst covid-19 epidemic

ACRONOMYS AND ABBREVIATIONS

FAO	Food Agricultural Organization
USA	United States of America
CIP	International Potato Centre
DC	Direct Current
W	watts
AH	Ampere hour
RPM	Revolutions per Minute
AMI	Agricultural Mechanization and Irrigation Engineering
CGIAR	Consultative Group on International Agricultural Research
M.C	Moisture content

Table of Contents

DECLARATION.....	i
ACKNOWLEDGEMENT	ii
ACRONOMYS AND ABBREVIATIONS	iii
Table of Contents	iv
List of Tables.....	vi
Table of Figures.....	vii
CHAPTER ONE: INTRODUCTION.....	1
INTRODUCTION	1
1.1 Background	1
1.2 Benefits of sweetpotatoes.....	3
1.3 Preservation of sweetpotatoes	4
1.5 JUSTIFICATION	6
1.6 SCOPE OF THE STUDY	6
1.7 OBJECTIVES	6
1.7.1 Main objective	6
1.7.2 Specific objectives.....	6
CHAPTER TWO: LITERATURE REVIEW.....	7
2.0 Introduction	7
2.1 sweetpotato production in Uganda.....	7
Uses of dried sweet potatoes	8
Traditional consumption.....	8
2.3 Types of drying methods	10
2.3.1 Open Sun Drying	11
2.3.2 Direct Solar Drying in Passive Mode	12
2.3.3 Indirect solar drying in Passive mode	13
2.3.4 Mixed-mode Solar drying	15
2.3.5 Indirect solar drying in active mode	15
CHAPTER THREE: MATERIALS AND METHODS	18
3.1 Equipment Description.....	18
3.2 Specific objective one: Design and fabrication.....	19

3.2.1 Design considerations	19
3.3 Design of components	19
3.3.1 Determination for product volume.....	19
3.3.2 Determination for mass of moisture to be removed from the products.....	20
Final relative humidity or equilibrium relative humidity, ERH [%]	20
3.3.3 Determination of drying rate	20
3.3.5 Determination of heat energy transferred to drying cabin	20
3.3.6 Determination for heat energy produced in the collector	21
3.3.7 Sizing and selection of the fan	21
3.3.7 Sizing of the Battery	22
3.3.8 Sizing of Solar Panel System.....	22
3.3.9 Determination of the total weight of the drying cabin.....	22
3.4 Design of air collector	22
3.4.1 Determination of collector efficiency	24
3.4.2 Determination of the total weight of the collector	24
3.4.3 Determination of support frames	24
3.4.4 Selection of Materials.	25
3.4.5 Construction of the prototype	26
3.6 Specific Objective Three: Financial analysis of the prototype.....	28
3.6.1 Net Present value (NPV).....	28
3.6.2 Profitability index	28
CHAPTER FOUR: RESULTS AND DISCUSSION	29
4.1 RESULTS AND DISCUSSIONS.....	29
Specific objective I	29
4.1.1 Design of drying cabin volume	29
4.1.2 Determination for mass of moisture to be removed from the products.....	29
4.1.3 Quantity of heat required for effective drying.....	30
4.1.4 Quantity of air needed to remove moisture from sweetpotato chips.....	30
4.1.5 Determination of air mass flow in the collector	30
4.1.6 Design of the air vent	31
4.1.7 Determination drying rate	31

4.1.8 Determination for heat energy required for moisture removal	31
4.1.11 Sizing of the Battery	32
4.1.12 Sizing of Solar Panel System.....	32
4.1.13 Sizing of the Arduino Uno microcontroller.....	33
Automation process.....	37
Program code developed using Arduino programming	38
Specific objective II Testing the performance of the prototype	44
Specific objective III; Financial analysis of the prototype.....	49
Variable costs;	51
Net present value (NPV);	51
CHAPTER FIVE.....	53
5 CONCLUSION AND RECOMMENDATIONS	53
5.1 Conclusion.....	53
5.2 Recommendations	53
