

FACULTY OF ENGINEERING
DEPARTMENT OF COMPUTER ENGINEERING
A FINAL YEAR PROJECT REPORT
WIRELESS HYBRID WITH MOBILE BASED
MONITORING AND ALERT SYSTEM

BY

NAME: BABISE KEVIN MICHEAL

REG NO: BU/UG/2017/14

CONTACT: 0786842944/0705412894

EMAIL: babskevon@gmail.com

SUPERVISOR: MR. LUSIBA BADRU

A final year project report submitted to the Faculty of Engineering department of computer engineering in partial fulfilment of the requirements for the award of a Bachelor's degree in Computer Engineering from Busitema University.

January 2022

DECLARATION

I, **BABISE KEVIN MICHEAL Reg. No BU/UG/017/14** hereby declare that this project proposal is my original work except where explicit citation has been made and it has not been presented to any institution of higher learning for any academic award.

Signed

Date...../...../.....

APPROVAL

I certify that the project proposal entitled “**WIRELESS HYBRID MOBILE BASED MONITORING AND ALERT SYSTEM**” has been drafted under my supervision and is submitted to the board of examiners with my approval.

Signature

MR. LUSIBA BADRU

Date...../...../.....

Department of Computer Engineering

ACKNOWLEDGEMENT

First and foremost, I would like to thank the Almighty God for the gift of life and for getting me through my studies and making this project idea a reality.

It would have been impossible for me to prepare this report without the encouragement, clear guidance, support and co-operation of many great teams I had at Busitema University, I would like with all my heart, like to thank these individuals and organisations for their gracious contributions towards this project. A lot of my sincere thanks go to my very skilled instructor Mr. Lusiba Badru who worked tirelessly to see that I finish the project successfully. Countless thanks still go to my parents, Mr. Babise Cornelius and Mrs. Wateta Lucy for financial support throughout my entire schooling years not forgetting my great brothers and Sisters for their general support, affection and encouragement. Finally, I acknowledge my fellow students with whom I shared a professional experience with in class.

May the Almighty God bless them abundantly.

ABSTRACT

Cardiovascular patients admitted in hospital are more likely to die from avoidable conditions and situations, whether due to complications from a heart attack or other serious health issues. This is because optimal treatment and patient monitoring is not ensured for all patients in government hospitals on a 24-hour 7-days basis except for those in Intensive Care Unit (ICU). This is as a result of reduction in staff for night and weekend shift reducing the capacity of the available staff and also the fact that during those times, physical and cognitive abilities of medical and paramedical staff may be, in addition, impaired due to sleep deprivation especially during night-time. This has resulted in avoidable deaths occurring mostly at night and during weekends. Therefore, a new system is required that will allow one medical work to effectively monitor multiple cardiovascular patients at once and also alert the medical worker whenever there is an issue via a mobile phone. This system should be able to be used on patients in private and public wards.

LIST OF ACRONYMS

CVDs	Cardiovascular diseases
LCD	Liquid Crystal Display
ECG	Electrocardiogram
CSS	Cascading Style Sheet
PHP	Hypertext Pre-processor
WHO	World Health Organisation
ICU	Intensive Care Unit
HTML	Hypertext Mark-up Language
SQL	Structured Query Language
DFD	Data Flow Diagram
Wi-Fi	Wireless Fidelity

LIST OF FIGURES

Figure 1:Flowchart of the proposed system	15
Figure 2:Block diagram for the hardware sub system	16
Figure 3:Diagrammatic representation of the system	16
Figure 4: Block diagram for the hardware subsystem	23
Figure 5: Block diagram for the software subsystem	24
Figure 6: System flow chart	25
Figure 7: Schematic diagram for the designed system	25
Figure 8: Mobile application Login page	26

ABSTRACT.....	v
LIST OF ACRONYMS	vi
LIST OF FIGURES	vii
CHAPTER ONE	1
1.0 Introduction.....	1
1.1 Background Study	1
1.2 Problem Statement	3
1.3 Objectives.....	3
1.3.1 Main Objective	3
1.3.2 Specific Objectives	3
1.4 Justification	4
1.5 Scope	4
1.5.2 Technical Scope.....	4
CHAPTER TWO: LITERATURE REVIEW	5
2.0 Introduction.....	5
2.1 Concepts, Descriptions and Definitions	5
2.1.1 Cardiovascular diseases	5
2.1.3 Patient Monitoring	6
2.2 Existing Systems	8
2.2.1 Traditional Patient Monitoring	8
2.2.2 Bedside Monitors (Comen STAR8000 Cardiac ICU Monitor).....	9
2.2.3 Standard 12-Lead ECG.....	9
2.2.4 Portable Monitoring Devices (Holter Monitor).....	10
2.2.5 TeleSitter	10
2.3 Weaknesses of Existing Systems	10
2.3.1 Traditional Patient Monitoring	10
2.3.2 Bedside Monitors (Comen Star8000 Cardiac ICU Monitor).....	11
2.3.3 Standard 12-Lead ECG.....	11
2.3.4 Portable Monitoring Devices (Holter Monitor).....	11

2.3.5 TeleSitter	11
2.4 Proposed System	11
CHAPTER THREE	13
3.0 Methodology	13
3.1 Requirement Gathering	13
3.1.1 Literature Review	13
3.1.2 Consultations	13
3.2 Requirements Analysis.....	13
3.3 System Analysis	13
3.3.1 Flow Chart	14
3.4 System Design.....	15
3.4.1 Block Diagram of Hardware Subsystem	15
3.4.2 Block Diagram of Software Subsystem.....	16
3.5 Modules of System.....	16
3.5.1 Hardware Subsystem	16
3.5.2 Software Subsystem	17
3.6 System Implementation.....	17
3.6.1 Software Implementation	17
3.6.2 Hardware Implementation	18
3.7 Testing and Validation	18
3.7.1 Unit Testing	18
3.7.2 Integration Testing.....	18
3.7.3 System Testing	18
3.7.4 Validation	18
CHAPTER FOUR: SYSTEM ANALYSIS AND DESIGN.....	20
4.0 Introduction.....	20
4.1 Requirement Analysis	20
4.1.1 functional Requirements.....	20
4.1.2 Non-Functional Requirements.....	21
4.2 System Design.....	22
4.2.1 Block Diagram for The System	22
4.2.2 System Data Flow Chart.....	24
4.2.3 Schematic Diagram.....	25

4.2.4 Physical Design	25
4.2.5 Mobile Application.....	26
CHAPTER FIVE: SYSTEM IMPLEMENTATION.....	29
5.0 INTRODUCTION	29
5.1 Development Platforms.....	29
5.1.1 Arduino IDE	29
5.1.2 Visual Studio Code (VSC)	29
5.1.3 Sublime Text.....	29
5.2 Code Design	29
5.3 System Testing and Evaluation	30
5.3.1 Unit Testing	30
5.3.2 Integrated Testing	30
5.3.3 System Testing	30
5.3.4 System Validation.....	31
5.3.4 System Evaluation	31
5.3.5 System operation	31
5.3.6 System Strength.....	32
5.3.7 System Weaknesses	32
CHAPTER SIX: DISCUSSION AND RECOMMENDATIONS.....	32
6.0 INTRODUCTION	32
6.1 Summary of Work Done	32
6.2 Critical Analysis/ Appraisal of The Work.....	32
6.3 Recommendations	33
6.4 Conclusion.....	33
6.5 REFERENCES	35
6.6 Appendices	39
Appendix 1: project code design	39
Appendix 2: some interview questions used in requirements gathering	51
